No. S 894

WEIGHTS AND MEASURES ACT 1975

WEIGHTS AND MEASURES (DEFENCES UNDER SECTION 19) REGULATIONS 2022

ARRANGEMENT OF REGULATIONS

Regulation

1. Citation and commencement
 2. Inadequate packages and non-standard packages
 3. Conditions under section 19(5) of Act
 4. Conditions under section 19(6) of Act
 5. Revocation
- The Schedules
-

In exercise of the powers conferred by section 37 of the Weights and Measures Act 1975, the Minister for Trade and Industry makes the following Regulations:

Citation and commencement

1. These Regulations are the Weights and Measures (Defences under Section 19) Regulations 2022 and come into operation on 21 November 2022.

Inadequate packages and non-standard packages

2. For the purpose of the definitions of “inadequate package” and “non-standard package” in section 2(1) of the Act, the prescribed amounts of error are as specified in the First Schedule.

Conditions under section 19(5) of Act

3.—(1) For the purpose of section 19(5)(b) of the Act, the conditions that the lot of packages is required to meet are as follows:

- (a) the number of non-standard packages in a sample of packages taken from the lot of packages is equal to or less than the number of non-standard packages allowed for the sample;
 - (b) there are no inadequate packages in the sample.
- (2) For the purpose of paragraph (1)(a), in determining the size of the sample to be taken from a lot of packages and the number of non-standard packages allowed for the sample —
- (a) where the number of packages in the lot of packages is fewer than 100, the sampling plan in Table 1 in the Second Schedule is to be applied; and
 - (b) in any other case, any of the sampling plans in the Second Schedule may be applied.

Conditions under section 19(6) of Act

4.—(1) For the purpose of section 19(6)(a)(i) of the Act, in determining if the weighed average quantity of any sample of packages taken from a lot of packages equals to or exceeds the quantity stated on the package or label attached to it —

- (a) the sampling plan in Table 1 in the Second Schedule is to be applied; and
- (b) the weighed average quantity equals to or exceeds the quantity stated on the package or label attached to it when

$$\frac{e_{ave}}{s} + SCF \geq 0,$$

where —

- (i) e_{ave} is the average error of the packages sampled;
- (ii) s is the sample standard deviation of the individual errors; and
- (iii) SCF is the applicable sample correction factor specified in the fourth column of Table 1 in the Second Schedule.

(2) In paragraph (1), “error” means the difference between the actual quantity of product in a package and the declared quantity of product stated on that package or on a label attached to that package, expressed as a negative figure if the actual quantity is less than the declared quantity.

(3) For the purpose of section 19(6)(a)(ii) of the Act, in determining the appropriate number of non-standard packages in any sample of packages taken from a lot of packages —

- (a) where the number of packages in the lot of packages is fewer than 100, the sampling plan in Table 1 in the Second Schedule is to be applied; and
- (b) in any other case, any of the sampling plans in the Second Schedule may be applied.

(4) In paragraph (3), “appropriate number of non-standard packages” means the number of non-standard packages allowed for a sample of packages.

Revocation

5. The Weights and Measures (Defences under Section 19) Regulations 2005 (G.N. No. S 845/2005) are revoked.

FIRST SCHEDULE

Regulation 2

AMOUNTS OF ERROR FOR PACKAGES

Declared quantity (g or ml) in weight or volume	Amount of error (% of declared quantity)	Amount of error (g or ml)
Not exceeding 50	9	—
Exceeding 50 but not exceeding 100	—	4.5
Exceeding 100 but not exceeding 200	4.5	—
Exceeding 200 but not exceeding 300	—	9
Exceeding 300 but not exceeding 500	3	—
Exceeding 500 but not exceeding 1,000	—	15
Exceeding 1,000 but not exceeding 10,000	1.5	—
Exceeding 10,000 but not exceeding 15,000	—	150
Exceeding 15,000	1	—

Errors are to be rounded up to the next 0.1 (g or ml) for a declared quantity less than or equal to 1,000 (g or ml), and to the next whole number (g or ml) for a declared quantity greater than 1,000 (g or ml).

Declared quantity (m) in length	Amount of error (% of declared quantity)
Not exceeding 5	No error allowed
Exceeding 5	2

Declared quantity in area	Amount of error (% of declared quantity)
All quantities	3

FIRST SCHEDULE — *continued*

Declared quantity in count	Amount of error (% of declared quantity)
Not exceeding 50 items	No error allowed
Exceeding 50 items	1 ^a

^a Calculate the error by multiplying the declared quantity by 1% and rounding the result up to the next whole number. The value of this result may be larger than 1% due to the rounding but this is acceptable because the products are whole items and cannot be divided further.

SECOND SCHEDULE

Regulations 3(2) and 4(1) and (3)

TABLE 1
SAMPLING PLAN 1

Number of packages in the lot of packages	Sample size to be taken	Number of non-standard packages allowed	Sample correction factor (SCF)
from 0 to 20	All	0	NA

TABLE 2
SAMPLING PLAN 2 (STEPWISE SAMPLING)

Number of packages in the lot of packages		Step no.	Cumulative sample size	Number of non-standard packages allowed
Minimum	Maximum			
100	139	1	35	0
		2	50	1
		3	60	2
		4	75	3
140	289	1	35	0
		2	50	1
		3	65	2
		4	80	3
		5	95	4
290	999	1	40	0
		2	50	1
		3	70	2
		4	90	3
		5	100	4
		6	115	5
1,000	100,000	1	40	0
		2	55	1
		3	70	2
		4	95	3
		5	105	4
		6	120	5
		7	135	6

SECOND SCHEDULE — *continued*

The stepwise sampling plan is to be applied as follows:

1. According to the number of packages in the lot of packages as set out in the first column of the table, apply the sampling plan steps applicable to that given number of packages. Starting from Step 1 in the second column of the table, take the sample size indicated in the third column of the table and determine the number of non-standard packages in the sample. If the number of non-standard packages in the sample of packages does not exceed the number of non-standard packages allowed at that step (as set out in the fourth column of the table), the lot of packages meets the condition under regulation 3(1)(a) and section 19(6)(a)(ii) of the Act.
2. Should the number of non-standard packages at Step 1 exceed the allowed number at that step, more samples are to be inspected up to the indicated cumulative sample sizes* at each of the next steps. If the number of non-standard packages in the cumulative sample size inspected at any of the next steps does not exceed the number of non-standard packages allowed for that step, the lot of packages meets the condition under regulation 3(1)(a) and section 19(6)(a)(ii) of the Act.
3. The lot of packages is rejected if, in the final step applicable to that lot of packages, the number of non-standard packages in the cumulative sample size exceeds the number of non-standard packages allowed for that step.

Example

A sample of 35 packages is taken from a lot of 120 packages (Step 1) and one non-standard package is discovered. A further 15 packages are taken from the lot, for a cumulative sample size of 50 packages (Step 2). If the number of non-standard packages remains at one, the lot of 120 packages meets the condition under regulation 3(1)(a) and section 19(6)(a)(ii) of the Act.

* The cumulative sample size refers to the total number of packages to be inspected at each step, inclusive of the packages inspected from previous steps, if any.

Made on 16 November 2022.
