2. Appendix II includes —

- (a) all species which may become threatened with extinction unless trade in specimens of such species is subject to strict regulation in order to avoid utilisation incompatible with their survival; and
- (b) other species which are subject to regulation in order that trade in specimens of certain species referred to in sub-paragraph (a) may be brought under effective control.

3. Appendix III includes all species which any contracting State or Party to CITES (also called in this Schedule the Convention) identifies as being subject to regulation within its jurisdiction for the purpose of preventing or restricting exploitation, and as needing the cooperation of other Parties in the control of trade.

4. In these Appendices, unless the context otherwise requires —

- “Conference of the Parties” means the Conference of the Parties to CITES;
- “Secretariat” means the Secretariat established under Article XII of CITES;
- “Standing Committee” means the Standing Committee of the Conference of the Parties established under Annex 1 of Resolution Conf. 11.1 (Rev. CoP16) adopted by the Conference of the Parties.

5. Species included in these Appendices are referred to —

- (a) by the name of the species; or
- (b) as being all of the species included in a higher taxon or designated part thereof.

6. The abbreviation “spp.” is used to denote all species of a higher taxon.

7. Other references to taxa higher than species are for the purposes of information or classification only. The common names included after the scientific names of families are for reference only. They are intended to indicate the species within the family concerned that are included in the Appendices. In most cases this is not all of the species within the family.

8. The following abbreviations are used for plant taxa below the level of species:

- (a) “ssp.” is used to denote subspecies; and
- (b) “var(s).” is used to denote variety (varieties).

9. As none of the species or higher taxa of FLORA included in Appendix I is annotated to the effect that its hybrids are to be treated in accordance with the provisions of Article III of the Convention, this means that artificially propagated

THE SCHEDULE — *continued*

hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.

10. The names of the countries in parentheses placed against the names of species in Appendix III are those of the Parties submitting these species for inclusion in this Appendix.

11. When a species is included in one of the Appendices, the whole, live or dead, animal or plant is included. In addition, for animal species listed in Appendix III and plant species listed in Appendix II or III, all parts and derivatives of the species are also included in the same Appendix unless the species is annotated to indicate that only specific parts and derivatives are included. The symbol # followed by a number placed against the name of a species or higher taxon included in Appendix II or III refers to a footnote that indicates the parts or derivatives of animals or plants that are designated as “specimens” subject to the provisions of the Convention in accordance with Article I, paragraph (b), sub-paragraph (ii) or (iii).

12. The terms and expressions below, used in annotations in these Appendices, are defined as follows:

(a) Extract

Any substance obtained directly from plant material by physical or chemical means regardless of the manufacturing process. An extract may be solid (e.g. crystals, resin, fine or coarse particles), semisolid (e.g. gums, waxes) or liquid (e.g. solutions, tinctures, oil and essential oils).

(b) Finished musical instruments

A musical instrument (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is ready to play or needs only the installation of parts to make it playable. This term includes antique instruments (as defined by the Harmonized System codes 97.05 and 97.06; Works of art, collectors pieces and antiques).

(c) Finished musical instrument accessories

A musical instrument accessory (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is separate from the musical instrument, and

THE SCHEDULE — *continued*

is specifically designed or shaped to be used explicitly in association with an instrument, and that requires no further modification to be used.

(d) Finished musical instrument parts

A part (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) of a musical instrument that is ready to install and is specifically designed and shaped to be used explicitly in association with the instrument to make it playable.

(e) Finished products packaged and ready for retail trade

Products, shipped singly or in bulk, requiring no further processing, packaged, labelled for final use or the retail trade in a state fit for being sold to or used by the general public.

(f) Powder

A dry, solid substance in the form of fine or coarse particles.

(g) Shipment

Cargo transported under the terms of a single bill of lading or air waybill, irrespective of the quantity or number of containers, packages, or pieces worn, carried or included in personal baggage.

(h) Ten (10) kg per shipment

*For the term “10 kg per shipment”, the 10 kg limit should be interpreted as referring to the weight of the individual portions of each item in the shipment made of wood of the species concerned. In other words, the 10 kg limit is to be assessed against the weight of the individual portions of wood of *Dalbergia*/*Guibourtia* species contained in each item of the shipment, rather than against the total weight of the shipment.*

(i) Transformed wood

Defined by Harmonized System code 44.09: Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planed, sanded or end-jointed.

(j) Wood-chips

THE SCHEDULE — *continued*

Wood that has been reduced to small pieces.
