(9) To avoid doubt, every application or document which is filed with, or delivered or conveyed to, a Coroner's Court using an identification code in compliance with the security procedures of the electronic filing service is to be treated as a secure electronic record within the meaning of the Electronic Transactions Act (Cap. 88).

Signing of electronic documents

8.—(1) Where any application or document is filed, delivered or conveyed using the electronic filing service, any requirement under the Act relating to the signing by, or the signature of, an authorised user or authorised agent, is deemed to be complied with if the identification code of the authorised user or authorised agent has been, directly or indirectly, applied to or associated with the application or document, or the transmission containing the application or document.

(2) For the purposes of paragraph (1) —

- (a) where the identification code of an authorised user is, directly or indirectly, applied to or associated with any application or document, or any transmission containing any application or document, which is in compliance with the security procedures of the electronic filing service —

Date of filing

9.—(1) Where any application or document is filed, delivered or conveyed using the electronic filing service by an authorised user or an authorised agent, it is deemed to be filed, delivered or conveyed on the date and at the time that the first part of the electronic transmission of the application or the document from the authorised user or the authorised agent is received in the computer system of the Coroners' Courts.

(2) The authorised user or authorised agent may produce a confirmation receipt issued by the electronic filing service provider as evidence of —

(4) Paragraphs (2)(b) and (c) and (3) apply to conditioned statements to the same extent and in like manner as they apply to affidavits.
