(2) Where the poison is contained in an ampoule, cachet or similar article, it shall not be necessary to label the article itself, if the box or other covering in which the article is enclosed is duly labelled.

(3) Nothing in section 6(2) of the Act or in these Rules shall require the labelling of any transparent cover or any wrapper, hamper,

packing case, crate or other covering used solely for the purpose of transport or delivery.

Labelling of name of poison

20.—(1) Subject to this rule, the name of a poison shall, for the purpose of the provisions relating to labelling, be the term under which it is included in the Poisons List.

(2) Where the term referred to in paragraph (1) describes a group of poisons and not the poison specifically, the name of the poison shall be —

(4) In the case of a preparation in the British Pharmacopoeia or the Formulary of the Pharmaceutical Codex which is named in accordance with rule 20(3) it shall not be necessary to state on the label the proportion of poison contained in the preparation, and in the case of any dilution or admixture of such a preparation, it shall be sufficient to state the proportion which the preparation bears to the total ingredients of the dilution or admixture.

(5) Where the poison is in tablets, pills, cachets, capsules, lozenges or similar articles, or in ampoules, it shall be sufficient if the label of the box or covering in which the articles are enclosed states the number of the articles and the amount of the poison, or in the case of such a preparation as is mentioned in paragraph (4), the amount of the preparation contained in each article.

Indication of character of poison

22.—(1) The container of any article specified in the Fifth Schedule shall, instead of being labelled with the word “Poison”, be labelled with the words specified in that Schedule as applicable to that article.

(3) Where any poison (other than a substance included in the First Schedule) is sold in a container and outer covering, being the container and outer covering in which it was obtained by the seller, it shall be sufficient if the name of the seller and the address of the premises on which the poison was sold appear only on the outer covering.

(4) Where the names of more than one person or more than one address appear on any label, there shall also be words on the label indicating clearly which person is the seller and at which of the addresses the poison was sold.

Form of containers

Special provisions with respect to transport of certain poisons

28.—(1) It shall not be lawful to consign for transport by a carrier any substance or article, other than a medicine, consisting of or containing any poison included in the Sixth Schedule, unless the package containing the substance or article is labelled conspicuously with the name of the poison and a notice indicating that it is to be kept separate from foodstuffs and from empty containers in which foodstuffs have been kept.

(2) It shall not be lawful for any person knowingly to transport any such substance or article, either on his own behalf or for another

(3) In a case where a substance included in the First Schedule is supplied, a record shall be kept on the premises in such a way that there can readily be traced at any time during a period of 2 years after the date on which the substance was supplied the following particulars:

- (a) the name and quantity of the poison supplied;
- (b) the date on which the poison was supplied;
- (c) the name and address of the person to whom the poison was supplied; and

30.—(1) This rule and rule 31 shall apply to any hospital, infirmary, dispensary, clinic, nursing home or other institutions at which human ailments are treated (referred to in this rule and in rule 31 as an institution).

(2) In any institution in which medicines are dispensed in a dispensing or pharmaceutical department in the charge of a person appointed for that purpose, no medicine containing a poison shall be supplied from that department, except in cases of emergency, for use in the wards, operating theatres or other sections of the institution, except in accordance with the requirements contained in paragraphs (3), (4) and (5).

(3) The medicines shall only be supplied upon a written order signed by a medical practitioner, dentist, or by a registered nurse in charge of a ward, theatre or other section of the institution.

- (4) The container of the medicine shall be labelled —
- (a) with words describing its contents; and
 - (b) in the case of substances included in the First Schedule (other than thermolabile substances), with a distinguishing mark or other indication indicating that the poison is to be stored in a cupboard reserved solely for the storage of poisons.

touch from the containers or articles other than poisons stored on the same premises.

(5) In every institution, every substance included in the First Schedule (other than thermolabile substances) which is stored in the wards shall be stored in a cupboard reserved solely for the storage of poisons.

(6) All places in which poisons are required by this rule to be stored shall be inspected at regular intervals of time not exceeding 3 months by a pharmacist or by some other person appointed for the purpose by the governing body or person in control of the institution.
