(2) Where the poison is contained in an ampoule, cachet or similar article, it shall not be necessary to label the article itself, if the box or other covering in which the article is enclosed is duly labelled.

(3) Nothing in section 6(2) of the Act or in these Rules shall require the labelling of any transparent cover or any wrapper, hamper,

packing case, crate or other covering used solely for the purpose of transport or delivery.

### **Labelling of name of poison**

**20.**—(1) Subject to this rule, the name of a poison shall, for the purpose of the provisions relating to labelling, be the term under which it is included in the Poisons List.

(2) Where the term referred to in paragraph (1) describes a group of poisons and not the poison specifically, the name of the poison shall be —

- (a) if the poison is the subject of a monograph in either the British Pharmacopoeia or the Pharmaceutical Codex, one or other of the names or synonyms or abbreviated names set out at the head of the monograph; and
- (b) in any other case, the accepted scientific name or the name descriptive of the true nature and origin of the poison.

(3) Notwithstanding anything in paragraphs (1) and (2), if the poison consists of, or is contained in, any preparation in the British Pharmacopoeia, or the Formulary of the Pharmaceutical Codex, or any dilution or admixture of such a preparation, the name of the poison may, for the purposes of this rule, be the name or synonym or abbreviated name used to describe the preparation in the British Pharmacopoeia or the Formulary of the Pharmaceutical Codex, with the addition of the letters B.P. or P.C., as the case may be.

(2) In the case of a preparation containing a poison specified in the first column of the Fourth Schedule, it shall be sufficient to state on the

label the particulars specified in the second column of that Schedule against the description of the poison.

(3) In the case of a preparation derived from nux vomica or from opium and containing one or more alkaloids of nux vomica or of opium named in the Poisons List, it shall be sufficient, so far as these alkaloids are concerned, to state on the label the proportion of strychnine or of morphine, as the case may be, contained in the preparation.

(4) In the case of a preparation in the British Pharmacopoeia or the Formulary of the Pharmaceutical Codex which is named in accordance with rule 20(3) it shall not be necessary to state on the label the proportion of poison contained in the preparation, and in the case of any dilution or admixture of such a preparation, it shall be sufficient to state the proportion which the preparation bears to the total ingredients of the dilution or admixture.

(5) Where the poison is in tablets, pills, cachets, capsules, lozenges or similar articles, or in ampoules, it shall be sufficient if the label of the box or covering in which the articles are enclosed states the number of the articles and the amount of the poison, or in the case of such a preparation as is mentioned in paragraph (4), the amount of the preparation contained in each article.

### **Indication of character of poison**

**22.**—(1) Instead of being labelled with the word “Poison”, the container of any article specified in the first column of the Fifth Schedule is to be labelled with the words specified opposite that article in the second column.

*[S 555/2016 wef 01/11/2016]*

(2) The said words or the word “Poison”, as the case may be, shall not be modified in meaning by the addition of any other word or mark, and shall —

(b) in all cases either be on a separate label or be surrounded by a line within which there shall be no other words except words with which the container of the poison is required to be labelled under this rule and rule 23.

(3) The Malay, Tamil and Chinese versions of the words prescribed in paragraph (2) shall be as set out in the Tenth Schedule.

### **Special cautions in case of certain substances**

**23.**—(1) It shall not be lawful —

(a) to sell or supply any liquid poison, other than a medicine, in a bottle of a capacity of less than 3.5 litres, unless the bottle is labelled with the words “Not to be taken” in red lettering or set against a red background, in the English, Malay, Tamil and Chinese languages;

(b) to sell or supply any poison consisting of or contained in any embrocation, liniment, lotion, liquid antiseptic or other medicine for external application unless the container is labelled with the name of the article and the words “For external use only”, in red lettering or set against a red background, in the English, Malay, Tamil and Chinese languages;

**Relaxation of certain labelling requirements**

**24.**—(1) Section 6(2)(d) of the Act shall not apply in the case of an article sold for the purpose of resale in the same container.

(2) The requirements of section 6(2)(d) of the Act shall be deemed to be satisfied in the case of a poison supplied from a warehouse or depot, if the container of the poison is labelled with the address of the supplier's principal place of business, or, in the case of a limited company, of the registered office of the company.

(3) Where any poison (other than a substance included in the First Schedule) is sold in a container and outer covering, being the container and outer covering in which it was obtained by the seller, it shall be sufficient if the name of the seller and the address of the premises on which the poison was sold appear only on the outer covering.

(4) Where the names of more than one person or more than one address appear on any label, there shall also be words on the label indicating clearly which person is the seller and at which of the addresses the poison was sold.

**Form of containers**

- (a) it is contained in a container impervious to the poison and sufficiently stout to prevent leakage arising from the ordinary risks of handling and transport; and
- (b) in the case of a liquid contained in a bottle of a capacity of less than 3.5 litres, not being a liquid made up ready to be taken for the internal treatment of human ailments or not being a local anaesthetic for injection in the treatment of human ailments, the outer surface of the bottle is fluted vertically with ribs or grooves recognisable by touch.

(2) This rule shall apply to poisons dispensed or supplied in accordance with section 7 of the Act.

- (c) on a shelf reserved solely for the storage of poisons and —
  - (i) no food is kept directly under the shelf; and
  - (ii) the container of the substance is rendered distinguishable by touch from the containers of articles and substances other than poisons stored upon the same premises.

(3) Where any substance mentioned in paragraph (2) is to be used in agriculture or horticulture, it shall not be lawful to store the substance on any shelf, or in any such part of the premises if food is kept in that part, or in any cupboard or drawer unless the cupboard or drawer is reserved solely for the storage of poisons to be so used.

**Transport of poisons**

**27.** It shall not be lawful to consign any poison for transport unless it is so packed as to avoid leakage arising from the ordinary risks of handling and transport.

**Special provisions with respect to transport of certain poisons**

**28.**—(1) It shall not be lawful to consign for transport by a carrier any substance or article, other than a medicine, consisting of or containing any poison included in the Sixth Schedule, unless the

package containing the substance or article is labelled conspicuously with the name of the poison and a notice indicating that it is to be kept separate from foodstuffs and from empty containers in which foodstuffs have been kept.

(2) It shall not be lawful for any person knowingly to transport any such substance or article, either on his own behalf or for another person, in any vehicle in which food is being transported, unless the food is carried in a part of the vehicle effectively separated from that containing the substance or is otherwise adequately protected from the risk of contamination.

### **Supply of medicines to outpatients from certain hospitals, etc.**

**29.**—(1) The provisions of the Act and of these Rules shall not apply to —

(2) The medicine shall only be supplied by, or on and in accordance with a prescription of, a medical practitioner for the purposes of medical treatment, or a dentist for the purposes of dental treatment, or a veterinary surgeon for the purposes of animal treatment.

(3) In a case where a substance included in the First Schedule is supplied, a record shall be kept on the premises in such a way that there can readily be traced at any time during a period of 2 years after the date on which the substance was supplied the following particulars:

- (a) the name and quantity of the poison supplied;
- (b) the date on which the poison was supplied;

- (c) the name and address of the person to whom the poison was supplied; and

- (5) The container of a poison shall —
- (a) be impervious to the poison and sufficiently stout to prevent leakage arising from the ordinary risks of handling and transport; and
  - (b) where the poison is a liquid of a quantity of less than 2.5 litres, not being a liquid made up ready to be taken for the internal treatment of human ailments and not being a local anaesthetic for injection in the treatment of human ailments, be a bottle the outer surface of which is fluted vertically with ribs or grooves recognisable by touch.

### **Supply of medicines for use in hospitals, etc.**

**30.**—(1) This rule and rule 31 shall apply to any hospital, infirmary, dispensary, clinic, nursing home or other institutions at which human ailments are treated (referred to in this rule and in rule 31 as an institution).

(2) In any institution in which medicines are dispensed in a dispensing or pharmaceutical department in the charge of a person appointed for that purpose, no medicine containing a poison shall be supplied from that department, except in cases of emergency, for use in the wards, operating theatres or other sections of the institution, except in accordance with the requirements contained in paragraphs (3), (4) and (5).

- (3) The medicines shall only be supplied upon a written order signed by a medical practitioner, dentist, or by a registered nurse in charge of a ward, theatre or other section of the institution.
- (4) The container of the medicine shall be labelled —
- (a) with words describing its contents; and
  - (b) in the case of substances included in the First Schedule (other than thermolabile substances), with a distinguishing mark or other indication indicating that the poison is to be stored in a cupboard reserved solely for the storage of poisons.
- (5) The container of a poison shall —
- (a) be impervious to the poison and sufficiently stout to prevent leakage arising from the ordinary risks of handling and transport; and
  - (b) where the poison is a liquid of a quantity of less than 2.5 litres, not being a liquid made up ready to be taken for the internal treatment of human ailments and not being a local anaesthetic for injection in the treatment of human ailments, be a bottle the outer surface of which is fluted vertically with ribs or grooves recognisable by touch.
