(5) Where the poison is in tablets, pills, cachets, capsules, lozenges or similar articles, or in ampoules, it shall be sufficient if the label of the box or covering in which the articles are enclosed states the number of the articles and the amount of the poison, or in the case of such a preparation as is mentioned in paragraph (4), the amount of the preparation contained in each article.

### **Indication of character of poison**

**22.**—(1) Instead of being labelled with the word “Poison”, the container of any article specified in the first column of the Fifth Schedule is to be labelled with the words specified opposite that article in the second column.

(3) Where any poison (other than a substance included in the First Schedule) is sold in a container and outer covering, being the container and outer covering in which it was obtained by the seller, it shall be sufficient if the name of the seller and the address of the premises on which the poison was sold appear only on the outer covering.

(3) Where any substance mentioned in paragraph (2) is to be used in agriculture or horticulture, it shall not be lawful to store the substance on any shelf, or in any such part of the premises if food is kept in that part, or in any cupboard or drawer unless the cupboard or drawer is reserved solely for the storage of poisons to be so used.

**Special provisions with respect to transport of certain poisons**

**28.**—(1) It shall not be lawful to consign for transport by a carrier any substance or article, other than a medicine, consisting of or containing any poison included in the Sixth Schedule, unless the package containing the substance or article is labelled conspicuously with the name of the poison and a notice indicating that it is to be kept separate from foodstuffs and from empty containers in which foodstuffs have been kept.

(2) It shall not be lawful for any person knowingly to transport any such substance or article, either on his own behalf or for another person, in any vehicle in which food is being transported, unless the food is carried in a part of the vehicle effectively separated from that containing the substance or is otherwise adequately protected from the risk of contamination.

(2) In any institution in which medicines are dispensed in a dispensing or pharmaceutical department in the charge of a person

appointed for that purpose, no medicine containing a poison shall be supplied from that department, except in cases of emergency, for use in the wards, operating theatres or other sections of the institution, except in accordance with the requirements contained in paragraphs (3), (4) and (5).

(3) The medicines shall only be supplied upon a written order signed by a medical practitioner, dentist, or by a registered nurse in charge of a ward, theatre or other section of the institution.

(4) The container of the medicine shall be labelled —

- (a) with words describing its contents; and
- (b) in the case of substances included in the First Schedule (other than thermolabile substances), with a distinguishing mark or other indication indicating that the poison is to be stored in a cupboard reserved solely for the storage of poisons.

(5) The container of a poison shall —
