(3) Nothing in section 6(2) of the Act or in these Rules shall require the labelling of any transparent cover or any wrapper, hamper,

packing case, crate or other covering used solely for the purpose of transport or delivery.

### **Labelling of name of poison**

**20.**—(1) Subject to this rule, the name of a poison shall, for the purpose of the provisions relating to labelling, be the term under which it is included in the Poisons List.

(4) In the case of a preparation in the British Pharmacopoeia or the Formulary of the Pharmaceutical Codex which is named in accordance with rule 20(3) it shall not be necessary to state on the label the proportion of poison contained in the preparation, and in the case of any dilution or admixture of such a preparation, it shall be sufficient to state the proportion which the preparation bears to the total ingredients of the dilution or admixture.

(5) Where the poison is in tablets, pills, cachets, capsules, lozenges or similar articles, or in ampoules, it shall be sufficient if the label of the box or covering in which the articles are enclosed states the number of the articles and the amount of the poison, or in the case of such a preparation as is mentioned in paragraph (4), the amount of the preparation contained in each article.

### **Indication of character of poison**

**22.**—(1) Instead of being labelled with the word “Poison”, the container of any article specified in the first column of the Fifth Schedule is to be labelled with the words specified opposite that article in the second column.

*[S 555/2016 wef 01/11/2016]*

(2) The said words or the word “Poison”, as the case may be, shall not be modified in meaning by the addition of any other word or mark, and shall —

(2) The requirements of section 6(2)(d) of the Act shall be deemed to be satisfied in the case of a poison supplied from a warehouse or depot, if the container of the poison is labelled with the address of the supplier's principal place of business, or, in the case of a limited company, of the registered office of the company.

(3) Where any poison (other than a substance included in the First Schedule) is sold in a container and outer covering, being the container and outer covering in which it was obtained by the seller, it shall be sufficient if the name of the seller and the address of the premises on which the poison was sold appear only on the outer covering.

(4) Where the names of more than one person or more than one address appear on any label, there shall also be words on the label indicating clearly which person is the seller and at which of the addresses the poison was sold.

**Form of containers**

**25.**—(1) It shall not be lawful to sell, whether by wholesale or by retail, or supply any poison unless —

- (a) it is contained in a container impervious to the poison and sufficiently stout to prevent leakage arising from the ordinary risks of handling and transport; and
- (b) in the case of a liquid contained in a bottle of a capacity of less than 3.5 litres, not being a liquid made up ready to be taken for the internal treatment of human ailments or not being a local anaesthetic for injection in the treatment of human ailments, the outer surface of the bottle is fluted vertically with ribs or grooves recognisable by touch.

(2) This rule shall apply to poisons dispensed or supplied in accordance with section 7 of the Act.

**Storage of poisons**

**26.**—(1) It shall not be lawful to store any poison except in a container impervious to the poison and sufficiently stout to prevent leakage from the container arising from the ordinary risks of handling and transport.

- (b) in a part of the premises which is partitioned off or otherwise separated from the remainder of the premises and to which customers are not permitted to have access; or
- (c) on a shelf reserved solely for the storage of poisons and —
  - (i) no food is kept directly under the shelf; and
  - (ii) the container of the substance is rendered distinguishable by touch from the containers of articles and substances other than poisons stored upon the same premises.

(3) Where any substance mentioned in paragraph (2) is to be used in agriculture or horticulture, it shall not be lawful to store the substance on any shelf, or in any such part of the premises if food is kept in that part, or in any cupboard or drawer unless the cupboard or drawer is reserved solely for the storage of poisons to be so used.

**Transport of poisons**

**27.** It shall not be lawful to consign any poison for transport unless it is so packed as to avoid leakage arising from the ordinary risks of handling and transport.

**Special provisions with respect to transport of certain poisons**

**28.**—(1) It shall not be lawful to consign for transport by a carrier any substance or article, other than a medicine, consisting of or containing any poison included in the Sixth Schedule, unless the

package containing the substance or article is labelled conspicuously with the name of the poison and a notice indicating that it is to be kept separate from foodstuffs and from empty containers in which foodstuffs have been kept.

(2) It shall not be lawful for any person knowingly to transport any such substance or article, either on his own behalf or for another person, in any vehicle in which food is being transported, unless the food is carried in a part of the vehicle effectively separated from that containing the substance or is otherwise adequately protected from the risk of contamination.

(2) The medicine shall only be supplied by, or on and in accordance with a prescription of, a medical practitioner for the purposes of medical treatment, or a dentist for the purposes of dental treatment, or a veterinary surgeon for the purposes of animal treatment.

(3) In a case where a substance included in the First Schedule is supplied, a record shall be kept on the premises in such a way that there can readily be traced at any time during a period of 2 years after the date on which the substance was supplied the following particulars:

- (a) the name and quantity of the poison supplied;
- (b) the date on which the poison was supplied;

- (c) the name and address of the person to whom the poison was supplied; and

### **Storage of poisons in institutions**

**31.**—(1) The requirements contained in this rule shall apply to the storage of poisons in institutions.

(2) In any institution in which medicines are dispensed in a dispensing or pharmaceutical department in charge of a person appointed for the purpose, all poisons other than those issued for use within the institution shall be stored in that department.

(3) In any institution to which paragraph (2) does not apply all poisons other than those issued for use within the institution shall be stored —

(a) in the charge of the person appointed for the purpose by the governing body or person in control of the institution; and

(b) in case of poisons which are included in the First Schedule either in a cupboard or drawer, or on a shelf, reserved solely for the storage of poisons.

(4) Where a poison to which paragraph (3) applies is stored on a shelf, the container of the poison shall be rendered distinguishable by touch from the containers or articles other than poisons stored on the same premises.

(5) In every institution, every substance included in the First Schedule (other than thermolabile substances) which is stored in the wards shall be stored in a cupboard reserved solely for the storage of poisons.

(6) All places in which poisons are required by this rule to be stored shall be inspected at regular intervals of time not exceeding 3 months by a pharmacist or by some other person appointed for the purpose by the governing body or person in control of the institution.
