Definitions of “examination”, “search” and “supplementary examination” in Act

2A.—(1) For the purposes of the definition of “examination” in section 2(1), the matters to be determined by an Examiner when conducting an examination in relation to an application for a patent are —

- (a) whether, taking into consideration all the relevant prior art, if any, that the Examiner is aware of or that has been discovered in a search —
 - (i) each claim of the invention disclosed in the application satisfies each condition or requirement for patentability under section 13;
 - (ii) the conditions specified in section 25(4) and (5) have been complied with;
 - (iii) the application discloses any additional matter referred to in section 84(1) or (1A) or any matter referred to in section 84(2);

- (b) whether the description, or any claim or drawing, in the application is so unclear, or any claim in the application is so inadequately supported by the description, that no meaningful opinion can be formed on whether the claimed invention satisfies all or any of the conditions for patentability under section 13(1);
- (c) whether any claim in the application relates to an invention for which no search has been completed; and
- (d) whether there is —
 - (i) any other application for a patent for the same invention, with the same priority date, filed by the same applicant or his successor in title; and
 - (ii) any earlier grant of a patent for the same invention, with the same priority date, to the same applicant or his successor in title.

(2) For the purposes of the definition of “search” in section 2(1), the matters to be discovered by an Examiner when conducting a search in relation to an application for a patent are the relevant prior art contained in —

- (a) the documentation prescribed under rule 40; and
- (b) any additional documentation that the Examiner is aware of and considers to be relevant.

(3) For the purposes of the definition of “supplementary examination” in section 2(1), the matters to be determined by an Examiner when conducting a supplementary examination in relation to an application for a patent (referred to in this paragraph as the application in suit) are —

- (a) whether each claim in the application is supported by the description of the invention;
- (b) whether, at the time the prescribed documents referred to in section 29(1)(d) are filed, each claim in the application in suit is related to at least one claim which —
 - (i) is set out in the prescribed documents relating to the corresponding application, corresponding

- international application or related national phase application referred to in section 29(1)(d), or to the application in suit during its international phase; and
- (ii) has been examined to determine whether the claim appears to satisfy the criteria of novelty, inventive step (or non-obviousness) and industrial applicability (or utility);
- (c) whether the invention is an invention referred to in section 13(2) that is not patentable;
 - (d) whether the invention is an invention referred to in section 16(2) that is not to be taken to be capable of industrial application;
 - (e) whether there is —
 - (i) any other application for a patent for the same invention, with the same priority date, filed by the same applicant or his successor in title; and
 - (ii) any earlier grant of a patent for the same invention, with the same priority date, to the same applicant or his successor in title; and

9.—(1) Subject to paragraph (2), a declaration for the purposes of section 17(2) made in or in connection with an application for a patent (referred to in this rule and rules 9A and 9B as the application in suit) shall be made at the time of filing the application in suit.

(2) A declaration for the purposes of section 17(2) may be made after the date of filing if —

(a) it would cause —

(i) the application in suit to have a declared priority date, where there was none previously; or

(ii) the declared priority date of the application in suit to be brought forward to an earlier date;

(b) it is made within 16 months from —

(i) where sub-paragraph (a)(i) applies, the declared priority date; or

(ii) where sub-paragraph (a)(ii) applies, the earlier date;

(c) it is made on Patents Form 57;

(d) the prescribed fee has been paid; and

(e) the condition referred to in paragraph (4) is satisfied.

(3) Where a request to the Registrar to correct a mistake in a declaration for the purposes of section 17(2) would, if granted, cause the declared priority date to be changed to a different date, the request shall not be granted unless —

(a) it is made within 16 months from the declared priority date, as changed;

(b) it is made on Patents Form 57;

(c) the prescribed fee has been paid; and

(d) the condition referred to in paragraph (4) is satisfied.

have been indicated in compliance with rule 4.10(a) and (b) of the Regulations under the Patent Co-operation Treaty.

(7) Where section 26(11) applies, a declaration for the purposes of section 17(2) shall not be made in or in connection with a new application referred to in section 26(11) if the declaration has not also been made in or in connection with the earlier application.

(8) In this rule and rules 9B and 9C —

“priority application” means an earlier relevant application specified in a declaration for the purposes of section 17(2);

“relevant application” has the same meaning as in section 17(5).

- (e) be made only if —
 - (i) the request relates to an international application for a patent (Singapore); or
 - (ii) where the request does not relate to an international application for a patent (Singapore), the condition referred to in paragraph (3) is satisfied.

(3) For the purposes of paragraph (2)(e)(ii), the condition is that —

- (a) the applicant has not made any request under section 27(2) to publish the application in suit during the period prescribed for the purposes of section 27; or
- (b) any such request has been withdrawn.

(4) Where the Registrar determines that every applicable condition referred to in section 17(2D) for granting a request under section 17(2B) has been satisfied, the Registrar shall grant the request and notify the applicant accordingly.

(5) Where the condition referred to in section 17(2D)(b) for granting a request under section 17(2B) has not been satisfied, the Registrar

shall notify the applicant that the Registrar intends to refuse the request unless —

- (a) observations are made or evidence is filed, within 2 months from the date of the notification, to satisfy the Registrar that the applicant's failure to file the application in suit within the period referred to in section 17(2A)(a) —
 - (i) occurred in spite of due care required by the circumstances having been taken; or
 - (ii) was unintentional; and
- (b) the Registrar is so satisfied on the observations made or evidence filed.

(6) Where paragraph (5) applies, the Registrar shall refuse the request under section 17(2B), and shall inform the applicant accordingly, if —

- (a) the applicant fails to make the observations or file the evidence within 2 months from the date of the Registrar's notification; or
- (b) the Registrar is not satisfied, on all the observations made and evidence filed, that the applicant's failure to file the application in suit within the period referred to in section 17(2A)(a) —

 - (ii) was unintentional.

Furnishing of application or file number and of priority documents to support declaration under section 17(2)

9B.—(1) Subject to paragraph (3), the applicant shall, before the end of the period of 16 months from the declared priority date, furnish to the Registry the application or file number of each priority application.

(2) Subject to paragraph (3), if the applicant fails to comply with paragraph (1) in respect of any priority application, the declaration for

the purposes of section 17 (2) shall be disregarded in so far as it relates to that priority application.

(3) Where the application in suit is an international application for a patent (Singapore), paragraphs (1) and (2) shall not apply in respect of any priority application the application or file number of which has been indicated in compliance with rule 4.10(a) of the Regulations under the Patent Co-operation Treaty.

(4) Where the Registrar, by notice sent to the applicant or proprietor, as the case may be, requires him to furnish to the Registry, in respect of any priority application, a copy of that priority application which is —

[S 81/2014 wef 14/02/2014]

(5) If the applicant or proprietor, as the case may be, fails to comply with paragraph (4) in respect of any priority application, the declaration for the purposes of section 17(2) shall be disregarded in so far as it relates to that priority application.

(3) If the applicant or proprietor, as the case may be, fails to comply with —

- (a) paragraph (1) in respect of any priority application; or

- (b) the Registrar's requirement under paragraph (2) in respect of any verification document relating to any priority application,

the declaration for the purposes of section 17(2) shall be disregarded in so far as it relates to that priority application.

INVENTORS

Mention of inventor

17.—(1) An application to the Registrar under section 24(1) or (3) by any person who alleges —

- (a) that he ought to have been mentioned as the inventor or joint inventor of an invention in any patent granted or published application for a patent for the invention; or
- (b) that any person mentioned as sole or joint inventor in any patent granted or published application for a patent for the invention ought not to have been so mentioned,

shall be made on Patents Form 7 and shall be accompanied by a statement setting out fully the facts relied upon.

(2) The Registrar shall send a copy of any such application and statement to —

- (a) every person registered as proprietor of, or applicant for, the patent (other than the applicant under section 24 himself);
- (b) every person who has been identified in the application for the patent or a statement filed under section 24(2)(a) as being, or being believed to be, the inventor or joint inventor of the invention; and

(3) Any recipient of the copies of the application and the statement who wishes to oppose the application shall —

- (a) within 2 months after the date of the Registrar's letter forwarding such copies to him, file a notice of opposition on Patents Form 58 setting out fully the grounds of his opposition; and

- (b) where there is a declared priority date, 16 months from the declared priority date.

(1A) A statement filed under section 24(2) shall be made on Patents Form 8.

(2) Where —

(a) the applicant is not the sole inventor; or

(b) the applicants are not the joint inventors of the invention,

and the application does not contain a declared priority date which relates to an earlier relevant application as defined in section 17(5)(b), the Registrar shall send a copy of the Patents Form 8 filed under paragraph (1) to each inventor who is not one of the applicants.

(3) Where the application is an international application for a patent (Singapore), the requirements of paragraph (1) shall be treated as having been complied with if the provisions of rules 4.1(a)(iv) and 4.6 of the Regulations under the Patent Co-operation Treaty have been complied with, whether or not there was any requirement that they be complied with.

APPLICATIONS FOR PATENTS

Application for grant of patent

19.—(1) A request for the grant of a patent shall be made on Patents Form 1.

(2) Where a document containing an indication that a patent is sought in pursuance of an application is filed with the Registrar without Patents Form 1 or the filing fee, the Form shall be filed with, and the fee shall be paid to, the Registry within one month from the date of the filing of the document.

(3) The specification contained in an application for a patent made under section 25 shall state the title of the invention and continue with the description and the claim or claims and the drawings, if any, in that order.

(4) The title appearing in the request and the specification shall be the same title, shall be short and precise, and shall indicate the matter to which the invention relates; and if in the opinion of the Registrar it fails to comply with this paragraph, the Registrar may reframe it so that it does so comply.

[S 81/2014 wef 14/02/2014]

(5) The description shall first state the title of the invention as appearing in the request and shall —

- (a) specify the technical field to which the invention relates;
- (b) indicate the background art which, as far as it is known to the applicant, can be regarded as useful for the understanding, searching and examination of the invention;
- (c) disclose the invention as claimed in such terms that the technical problem, even if not expressly stated as such, and its solution can be understood, and shall state the advantageous effects, if any, of the invention with reference to the background art;
- (d) briefly describe the figures in the drawings, if any;
- (e) set forth at least one mode for carrying out the invention claimed, with examples where appropriate, and with reference to the drawings, if any; and

(f) indicate explicitly, when it is not otherwise obvious from the description or the nature of the invention, the way or ways in which the invention satisfies the condition in section 13(1)(c) of being capable of industrial application.

(6) The number of claims shall be reasonable in consideration of the nature of the invention claimed.

[S 81/2014 wef 14/02/2014]

(6A) Where there are 2 or more claims, the claims shall be numbered consecutively in Arabic numerals.

[S 81/2014 wef 14/02/2014]

(7) The definition in the claim of the matter for which protection is sought shall be in terms of the technical features of the invention which may be expressed in structural, functional or mathematical terms.

(8) Claims shall be written —

(a) in 2 parts, the first part consisting of a statement indicating those technical features of the invention which are necessary in connection with the definition of the claimed subject-matter and which, in combination, appear to be part of the prior art and the second part preceded by the words “characterised in that”, “characterised by”, “wherein the improvement comprises”, or other words to the same effect, followed by a statement stating concisely the technical features which, in combination with the features stated in the first part, define the matter for which protection is sought; or

(b) in a single statement containing a recitation of a combination of several elements or steps, or a single element or step, which defines the matter for which protection is sought.

(9) Claims shall not rely, in respect of the technical features of the invention, on references to the description or drawings, unless such a reference is necessary for the understanding of the claim or enhances the clarity or conciseness of the claim.

(10) Where —

- (a) the documents filed at the Registry to initiate an application for a patent include something which —
 - (i) is or appears to be a description of the invention for which the patent is sought; and
 - (ii) is in a language other than English; and
- (b) the applicant has not filed an English translation of that thing,

the Registrar shall notify the applicant that an English translation of that thing is required.

(11) Where the applicant has been notified under paragraph (10), he shall, within 2 months from the date of the notification, file an English translation of that thing.

(12) If the applicant fails to comply with paragraph (11), the Registrar shall refuse his application for a patent.

(13) A request to withdraw an application for a patent shall be made by filing Form CM9.

[S 81/2014 wef 14/02/2014]

Micro-organisms

20. The Fourth Schedule shall have effect in relation to certain applications for patents, and granted patents, for inventions which require for their performance the use of micro-organisms.

Drawings

21.—(1) Drawings forming part of an application for a patent made under section 25 shall be on sheets the size of which shall be A4 (29.7 cm x 21 cm).

(2) The sheets shall not contain frames round the usable or used surface.

(3) The minimum margins shall be as follows:

- (a) top: 2.5 cm;
- (b) left side: 2.5 cm;

(c) right side: 1.5 cm; and

(d) bottom: 1.0 cm.

(4) The margins, when submitted, must be completely blank.

(5) Drawings shall be executed as follows:

(a) without colouring in durable, black, sufficiently dense and dark, uniformly thick and well-defined lines and strokes to permit satisfactory reproduction;

(b) cross-sections shall be indicated by oblique hatching which should not impede the clear reading of the reference signs and leading lines;

(c) the scale of the drawings and the distinctiveness of their graphical execution shall be such that a photographic reproduction with a linear reduction in size to two-thirds would enable all details to be distinguished without difficulty. If, as an exception, the scale is given on a drawing, it shall be represented graphically;

(d) all numbers, letters and reference lines, appearing on the drawings, shall be simple and clear and brackets, circles and inverted commas shall not be used in association with numbers and letters;

(e) each element of each figure shall be in proper proportion to each of the other elements in the figure, except where the use of a different proportion is indispensable for the clarity of the figure;

(f) the height of the numbers and letters shall not be less than 0.32 cm and for the lettering of drawings, the Latin and, where customary, the Greek alphabets shall be used;

(g) the same sheet of drawings may contain several figures; where figures drawn on 2 or more sheets are intended to form one whole figure, the figures on the several sheets shall be so arranged that the whole figure can be assembled without concealing any part of the partial figures; and the different figures shall be arranged without wasting space, clearly separated from one another and shall be numbered

consecutively in Arabic numerals, independently of the numbering of the sheets;

- (h) reference signs not mentioned in the description or claims shall not appear in the drawings, and vice versa; and the same features, when denoted by reference signs, shall throughout the application, be denoted by the same signs;
- (i) the drawings shall not contain textual matter, except, when required for the understanding of the drawings, a single word or words such as “water”, “steam”, “open”, “closed”, “section on AA”, and in the case of electric circuits and block schematic or flow sheet diagrams, a few short catchwords; and
- (j) the sheets of drawings shall be numbered in accordance with rule 23(13) and (14).

(6) Flow sheets and diagrams shall be considered drawings for the purposes of these Rules.

(7) Paragraphs (1) to (4) and (5)(f), (g) and (j) shall not apply to any drawing to be filed with the Registry using the electronic online system, and that drawing shall instead comply with practice directions issued by the Registrar in place of the requirements of those paragraphs.

Abstracts

22.—(1) [*Deleted by S 81/2014 wef 14/02/2014*]

(2) The abstract shall contain a concise summary of the disclosure as contained in the specification.

(3) The summary shall indicate the technical field to which the invention belongs and be drafted in such a way which allows a clear understanding of the technical problem to which the invention relates, the gist of the solution of that problem through the invention, and the principal use or uses of the invention.

(4) Where appropriate, the abstract shall also contain the chemical formula which, among those contained in the specification, best characterises the invention but shall not contain statements on the

alleged merits or value of the invention or on its speculative application.

(5) The abstract shall be as concise as the disclosure permits and shall normally not contain more than 150 words.

(6) If the specification contains any drawings, the applicant shall indicate on the abstract the figure or, exceptionally, the figures of the drawings which he suggests should accompany the abstract when published.

(7) The Registrar may decide to publish one or more other figures if he considers that they better characterise the invention.

(8) Each main feature mentioned in the abstract and illustrated by a drawing shall be followed by the reference sign used in that drawing.

(9) The abstract shall be so drafted that it constitutes an efficient instrument for the purposes of searching in the particular technical field, in particular by making it possible to assess whether there is a need to consult the specification itself.

Size and presentation of documents

23.—(1) Subject to paragraph (29), this rule shall apply to all documents (including drawings) making up an application for a patent, including any replacement thereof, to be filed with the Registry by any means.

(1A) All documents referred to in paragraph (1) shall be in English.

(2) Unless otherwise provided, the specification (including any drawing therein), abstract and any replacement sheet thereof shall be filed singly.

(3) All documents referred to in paragraph (1) shall be so presented as to permit direct reproduction by photography, electrostatic or electronic processes, scanning, photo offset and microfilming, in an unlimited number of copies.

(4) All sheets must be free from cracks, creases and folds.

(5) Only one side of the sheet shall be used.

(6) All documents referred to in paragraph (1) shall be in A4 paper size (29.7 cm x 21 cm) and shall be on pliable, strong, white, smooth, matt and durable paper.

(7) Each sheet (other than drawings) shall be used with its short sides at the top and bottom (upright position).

(8) The request for the grant of a patent, the description, claims, drawings and abstract shall each commence on a new sheet.

(9) The sheets shall be so connected that they can be easily turned when consulted, and easily separated and joined again if they have been separated.

(10) The minimum margins of the sheets containing the description, the claims and the abstract shall be as follows:

- (a) top: 2.0 cm;
- (b) left side: 2.5 cm;
- (c) right side: 2.0 cm; and
- (d) bottom: 2.0 cm.

(11) The margins of the documents making up the application, when filed, and of any replacement documents, must be completely blank.

(12) In the application, except in the drawings —

- (a) all sheets in the request shall, when filed, be numbered consecutively; and
- (b) all other sheets shall, when filed, be numbered consecutively as a separate series,

and all such numbering shall be in Arabic numerals placed at the top or bottom of the sheet, in the middle, but not in the top or bottom margin.

(13) All sheets of drawings contained in the application shall be numbered consecutively as a separate series.

(14) Such numbering shall be in Arabic numerals placed at the top or bottom of the sheet, in the middle, but not in the top or bottom margin.

(15) Every document (other than drawings) referred to in paragraph (1) shall be typed or printed in a dark, indelible colour in at least 1½ line spacing and in characters of which the capital letters are not less than 0.21 cm high except that graphic symbols and characters and chemical and mathematical formulae may be written or drawn, in a dark indelible colour.

(16) The request for the grant of a patent, the description, claims and abstract shall not contain drawings.

(17) The description, claims and abstract may contain chemical or mathematical formulae.

(18) The description and the abstract may contain tables.

(19) The claims may contain tables only if their subject-matter makes the use of tables desirable.

(20) In all documents referred to in paragraph (1), units of weights and measures shall be expressed in terms of the metric system.

(21) If a different system is used, units of weights and measures shall also be expressed in terms of the metric system.

(22) Temperatures shall be expressed in degrees Celsius.

(23) For the other physical values, the units recognised in international practice shall be used, for mathematical formulae the symbols in general use, and for chemical formulae the symbols, atomic weights and molecular formulae in general use shall be employed.

(24) In general, use should be made of technical terms, signs and symbols generally accepted in the field in question.

(25) If a formula or symbol is used in the specification, a copy thereof, prepared in the same manner as drawings, shall be furnished if the Registrar so directs.

(26) The terminology and the signs shall be consistent throughout the application.

(27) All documents referred to in paragraph (1) shall be reasonably free from deletions and other alterations, over-writings and interlineations and shall, in any event, be legible.

(28) Non-compliance with this rule may be authorised by the Registrar if the authenticity of the content is not in question and the requirements for good reproduction are not in jeopardy.

(29) Paragraphs (2) and (4) to (15) shall not apply to any document to be filed with the Registry using the electronic online system, and that document shall instead comply with practice directions issued by the Registrar in place of the requirements of those paragraphs.

Form of statements, counter-statements and evidence

24. Rule 23(3) to (7) shall apply, with the necessary modifications, to any statement, counter-statement or evidence filed, unless the Registrar directs otherwise.

Unity of invention

25.—(1) Without prejudice to the generality of section 25(5)(d), where 2 or more inventions are claimed (whether in separate claims or as alternatives within a single claim), such inventions shall be treated as being so linked as to form a single inventive concept only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

(2) In this rule, “special technical features” means those technical features which define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.
